

Varroc Lighting Systems Opens Larger Vietnam Facility to Support Regional Market Growth

NEWS • 27 giugno 2018

The company's new Triom production facility continues its global expansion in emerging two- and four-wheeled vehicle markets

VIETNAM, June 27, 2018 – Varroc Lighting Systems, a leading global supplier of exterior vehicle lighting, is expanding its global capabilities in key emerging markets with the opening of a new production facility in Vietnam, boosting their ability to deliver leading-edge technology to customers in the region.

The new facility, located about 30 minutes outside of Hanoi, builds upon the two-wheel lighting success of Triom, a Varroc majority-owned Italian lighting company, and better positions Varroc Lighting to serve the four-wheel lighting market.

“Our presence in Vietnam with Triom has been very successful over the past five years,” said Varroc Lighting Systems President and CEO Stephane Vedie. “With this expansion, we now have an opportunity to build on that success. Our new facility puts us in a strong competitive position to support new and existing two-wheel and four-wheel customers in the ASEAN region.”

The new facility will employ over 120 employees and has the opportunity for further expansion in the future.
